

MALDON PRE-1852 EUCALYPTS
DATE: February-April 2017; May, Oct 2018, May-June 2019, Jan 2021

Recordings done by Maldon Urban Landcare Inc. (MULGA).

 Circumference measured at **1.3m** (breast height, BH) or as recorded in NOTES. **DBHOB** – diameter at BH over bark, calculated by circumference/3.14. **AGE** – at time of survey, estimated by DBHOB/3.5 (average growth rate in trunk diameter/year, mm), to nearest 5 years. (Ref. 2001 *Box-Ironbark Forests & Woodlands Investigation Final Report*, Environment Conservation Council).

MASC: Mt. Alexander Shire Council.

* Tree numbers asterisked indicate trees with a DBHOB less than the minimum diameter threshold (70cm) for large trees for EVC 61 Box Ironbark Forest and EVC 70 Hillcrest Herb-rich Woodland.
